To whom it may concern,

Re: regarding Bill #5283

I am writing in support of this bill. Agriscience is a crucial part of our student's education. As we all know lack of funding often prevents these important programs from continuing.

*Countless hours have been spent creating a hold harmless for ag centers, so we will be guaranteed sufficient funding in the future.

*Town tuition requirement need to be eliminated so that the financial burden of sending towns allow Agriscience schools to inevitably increase enrollment.

*This will finally achieve funding equality between Agriscience and other choice school options in the state.

Please support the future of this bill.

Respectfully,

Ane Starr
